ACKNOWLEDGEMENTS

The production of this report would not have been possible without the concerted effort of the police departments and sheriffs' offices throughout the State of Wyoming who report accurately and regularly to the Wyoming Uniform Crime Reporting Program Section of the Center for Criminal Justice Research. The significance of their contribution is demonstrated in this report, which presents detailed information on the extent and fluxuation of crime in Wyoming.

The cover of the report features a contour map illustrating the geographic distribution of county Crime Index rates. Appreciation is extended to The Institute for Policy Research of the University of Wyoming for producing the contour maps featured on the cover and in the Index Offenses by County section.

INTRODUCTION

This annual report of Crime in Wyoming, 1984, presents data on reported crime in Wyoming during calendar year 1984, and examines crime trends experienced in Wyoming during the past five years (1980-1984).

The data presented in this report were compiled from Uniform Crime Reporting (UCR) records submitted by Wyoming law enforcement agencies. These records are designed to collect pertinent standardized law enforcement data at the city, county and state levels, and were prepared in compliance with the Federal Bureau of Investigation (FBI) Uniform Crime Reporting program standards and definitions.

Local law enforcement agencies prepare UCR forms containing offense, clearance, arrest and supplemental information, and submit the reports on a monthly basis to the State UCR Section of the Center for Criminal Justice Research, Division of Criminal Identification, Office of the Attorney General.[1] The UCR Section then verifies the reports, automates the data for later analysis at the State level and forwards the reports to the FBI for use in compilation and analysis of national crime statistics.

It is important to note constraints which should be recognized in interpreting and drawing conclusions from the data contained herein. Although Wyoming has yet to achieve 100 percent reporting of crime data by law enforcement agencies, 73 individual agencies currently report UCR data and these agencies serve jurisdictions representing 98.0 percent of the State population.[2] Twenty-three of these agencies are sheriffs' offices and fifty are police departments.

---

[1] See W.S. 1977 7-1-122 for legislation mandating the reporting of crime information to the Attorney General's Office.

[2] The population figures used in preparing this report are estimates calculated from population data from the U.S. Department of Commerce, Bureau of Census and the Division of Research and Statistics, Department of Administration and Fiscal Control, State of Wyoming.

Another limitation in crime reporting practices concerns the question of how much crime is actually being reported. Law enforcement agencies are capable only of reporting crimes known to them. In many instances, citizens do not report crimes directly to these agencies but may report them to the prosecuting authorities. A considerable volume of crime is never reported to law enforcement agencies because the victims may consider the offenses against them to be of little consequence, they may believe there is nothing the police can do about them, or they may fear retaliation from the offender. Consequently, information concerning some offenses is never entered into the present statistical reporting system.

The UCR program collects data on a variety of crimes, which it categorizes as Part I crimes and Part II crimes.[3] The Part I crimes include the traditional crime Index offenses of murder, rape, robbery, aggravated assault, burglary, larceny-theft and auto theft. Arson was added as a Part I offense in 1979. The "Modified Crime Index" consists of the "Crime Index" items, plus arson. For these offenses the UCR program collects information regarding the incidence of the offenses, certain supplemental crime information, and arrest data. For Part II offenses, however, the UCR program collects only arrest data. The UCR figures do not, therefore, necessarily measure the true incidence of crimes or the actual economic loss incurred by victims.

Crimes and arrests should not be compared on a one-to-one basis; a crime is an event while an arrest relates to an individual. The two figures may not match precisely, for example, because several crimes may be solved by the arrest of a single individual. In such a case each of the crimes will be reported, but only a single arrest will appear, though each of the crimes for which the offender has been arrested may have been cleared by the arrest. Similarly, the figures will not match where a single crime is committed by multiple offenders and each of the offenders is arrested. In this situation, a single crime is reported in UCR figures, a single clearance by an arrest appears, but several people appear in the arrest figures.

---

[3] See page 122 for definitions.

In spite of these limitations the information presented in this report portrays the most accurate and realistic assessment of crime in Wyoming. UCR statistics are not designed as indicators of agency activity, but rather pertain to offenses occurring within a specific geographic area.

A causal relationship exists between crime and many socio-economic factors, as well as transportation routes. Consequently, caution is needed when comparing agencies. Reported crime activity, however, is a measurable quantity and, as such, it should be used to present the clearest possible picture of the dimensions, fluctuations and impact of crime in Wyoming.

Our readers are urged to use caution when interpreting the "percent change" figures which appear throughout this report. Several of the Index offenses, murder for example, occur relatively infrequently. Given the comparatively low volume of these offenses, modest fluctuations may result in significant percent changes.

The percent change figures used in this report were calculated by comparing the number of offenses reported by each law enforcement agency throughout the state while controlling for missing data. If an agency failed to report crime data for a portion of a year, only those months in each of the comparison years for which complete data are available have been used in the calculation of percent change figures.

Similarly, missing data have been excluded from the calculation of percent change figures when comparing the volume and rate of crime to 1980 levels. Agencies which did not participate in the UCR program in 1980 were not included in subsequent years in the calculation of percent change figures. This method of calculation is used in order to avoid artificial fluctuations in reported crime based on changes in the number of contributing agencies or their reporting frequency.

CRIME INDEX

The offenses which comprise the Crime Index are all serious, either by their nature or by the frequency with which they occur, and each presents a common law enforcement problem. Crimes within the Index are categorized as Violent Crimes (which include murder, forcible rape, robbery, and aggravated assault) or as Property Crimes (which include burglary, larceny-theft, and motor vehicle theft). By congressional mandate, arson was added as a reporting offense in the latter part of 1978. Its data collection is separate and except where noted, it is presented independently of other offense data in this report.

During 1984 the volume of Crime Index offenses reported to Wyoming law enforcement agencies fell 8.4 percent when compared to 1983 figures. See Table 1. This is a significant decline in reported crime and it represents the third consecutive annual decrease. During the past year a total of 18,789 offenses were reported or known to law enforcement agencies, compared to 20,468 in 1983.

Seven of the eight offense categories reported noted a decline in 1984, ranging from minus 1.8 percent for rape to minus 56.7 percent for murder. Aggravated assault was the only offense which rose (8.6 percent) compared with 1983. Property offenses, as a group, declined 9.1 percent. Due to the increase in aggravated assaults, the violent crimes, as a group, rose 2.5 percent.

The extent of the three year decline in the Crime Index emerges in our five year comparison of crime and crime rates. In 1984 both the volume of crime and the rate of crime per 10,000 persons was at least 20 percent below the 1980 levels. See Figures 1 and 5.

The data in Table 1 and Figure 1 demonstrate the significance of the decline. Reported crime reached a high during 1981, followed by declines in 1982 through 1984.

NATIONAL AND REGION CRIME RATES

During 1984 the Rocky Mountain Region reported 14.9 percent more Index crimes per 10,000 residents than the rate for the nation as a whole. The eight-state Rocky Mountain Region had 577.9 Crime Index offenses per 10,000 inhabitants, while nationally there were 503.1 Crime Index offenses per 10,000 inhabitants. See Figure 2.

The property crime rate was 18.8 percent higher for the Rocky Mountain Region, with 533.7 reported property offenses per 10,000 inhabitants, compared with 449.2 per 10,000 inhabitants for the nation as a whole. However, the violent crime rate of 44.1 for the Rocky Mountain Region was 18.2 percent lower than the 53.9 rate for the nation.

Within the eight-state Rocky Mountain Region, Wyoming had the second lowest Crime Index rate with 393.9[4] offenses per 10,000 inhabitants. The Crime Index, as well as the Violent Crime and Property Crime components are reported for each of the regional states in Figure 2.

---

[4] The Federal Bureau of Investigation's Crime in the United States, 1984, reports a lower Crime Index rate for Wyoming than used in Crime in Wyoming, 1984, because of a higher federal estimate of Wyoming's population in 1984. The federally reported rates for Wyoming are: Total Crime Index rate: 368.3; Violent Crime rate: 24.2; Property Crime rate: 344.1. Rates for the other states in Figure 2 are from Crime in the United States, 1984.

VIOLENT CRIMES

Violent crimes involve the element of personal confrontation between the perpetrator and the victim, and entail the use or threat of force or violence. By their very nature, violent crimes are considered more serious than property crimes.

Three of the four offenses in the violent crime category declined in 1984. See Table 1. Murder noted the most substantial decline in 1984, falling 56.7 percent. Robbery was off 22.4 percent, while forcible rape was down 1.8 percent. Aggravated assault, the most frequently occurring violent Index offense, rose 8.6 percent in 1984, and this offense was responsible for violent crimes, as a group, rising 2.5 percent in volume when compared with 1983. The violent offenses as a group accounted for 6.6 percent of the 1984 total Crime Index, compared to 5.9 percent in 1983. See Figure 9.

Violent crimes as a group largely followed the trend established by the Index as a whole during the past five years. See Figure 3. An increase occurred in 1981 which was more than countered by substantial declines in both 1982 and 1983. While 1984 violent crimes increased slightly in comparison with the same reporting agencies in 1983, a difference in contributing agencies results in the 1984 violent crimes being slightly lower than 1983's when both 1983 and 1984 are compared with 1980. The 1984 volume of violent crime was down over a third from the level established in 1980.

Figure 3

VIOLENT CRIMES

Percent Change From 1980

	1980	1981	1982	1983	1984
% Change From 1980	-	+12.2	-21.3	-35.6	-35.8

PROPERTY CRIMES

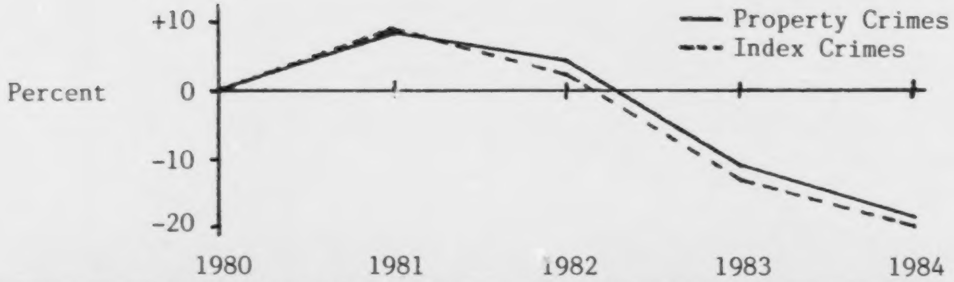
Property crimes entail property taken from one person by another. Although property crimes are less serious in nature than their violent crime counterparts of the Index, they represent, by far, the bulk of the total Crime Index (see page 18). By virtue of the large volume of property offenses, they present a serious problem to law enforcement agencies.

As a group, the number of property crimes were off 9.1 percent in 1984 when compared to 1983. See Table 1. This represents the third consecutive yearly decline for the property offenses as a whole. Larceny-theft led the decline, falling 9.2 percent in 1984. Burglaries were down 9.1 percent and motor vehicle theft decreased 7.4 percent in 1984. Property crimes accounted for 93.4 percent of the total Crime Index in 1984, compared to 94.1 percent in 1983.

During the past five years, the property crimes as a group demonstrated the same general pattern of change as the Crime Index, as would be expected with property offenses accounting for over 90 percent of all offenses. See Figure 4. The increase in 1981 was offset by decreases in 1982 through 1984. The continued decline in 1984 brought the volume of property crimes below the 1980 level by almost 20 percent.

Figure 4

PROPERTY CRIMES
1980 - 1984
Percent Change From 1980



% Change From 1980	-	+ 8.1	+ 4.6	-11.3	-18.6

CRIME RATES

Crime rates represent the rate of crime in relation to the population of a given jurisdiction. The rates are calculated to provide agencies with a means of measuring the magnitude of the crime problem that exists in relation to the number of people who reside in their jurisdiction. Crime rates allow the comparison of the volume of crime in different jurisdictions having different populations.

The population base figures used in estimating the population of Wyoming for this report were compiled from two different sources: United States Department of Commerce, Bureau of the Census, and the Department of Administration and Fiscal Control, Division of Research and Statistics, State of Wyoming.[5] In calculating the population estimates for this report we have determined the percentage difference between the 1980 Bureau of the Census enumeration and the 1980 Wyoming Division of Research and Statistics estimates. These percentage differences are then applied to the 1984 Wyoming Division of Research and Statistics estimates to calculate our population figures. This method was adopted in order to adjust the State estimates to the decennial Census enumeration.

All crime rates presented in this report are per 10,000 population. Crime rates are calculated by dividing the number of offenses by the population and multiplying the result by 10,000. Furthermore, since by UCR definition the victims of forcible rape are always female, the rape rates are per 10,000 females.

---

[5] U.S. Department of Commerce, Bureau of the Census, *1980 Census of Population and Housing, PHC80-P-52, Wyoming, Preliminary Population and Housing Unit Counts* (Washington, D.C.: Bureau of the Census, 1980), and Steve Furtney and Steve Sommers, Division of Research and Statistics, Department of Administration and Fiscal Control, State of Wyoming, *Wyoming Population and Employment Forecast Report, 7th Edition* (Cheyenne: State of Wyoming, 1984).

The crime rate for the Index offenses fell 9.0 percent in 1984, down from 432.8 per 10,000 population in 1983, to 393.9 in 1984. This represents the third consecutive annual drop in crime rates. See Table 2.

Aggravated assault was the only offense which increased over 1983. The rate of violent crimes as a group rose slightly due to the influence of the comparatively large number of aggravated assaults. The 1984 violent crime rate was down over one third from the 1980 rate.

The property crime rate continued its decline for a third year, bringing the 1984 level below that of 1980 by over 20 percent.

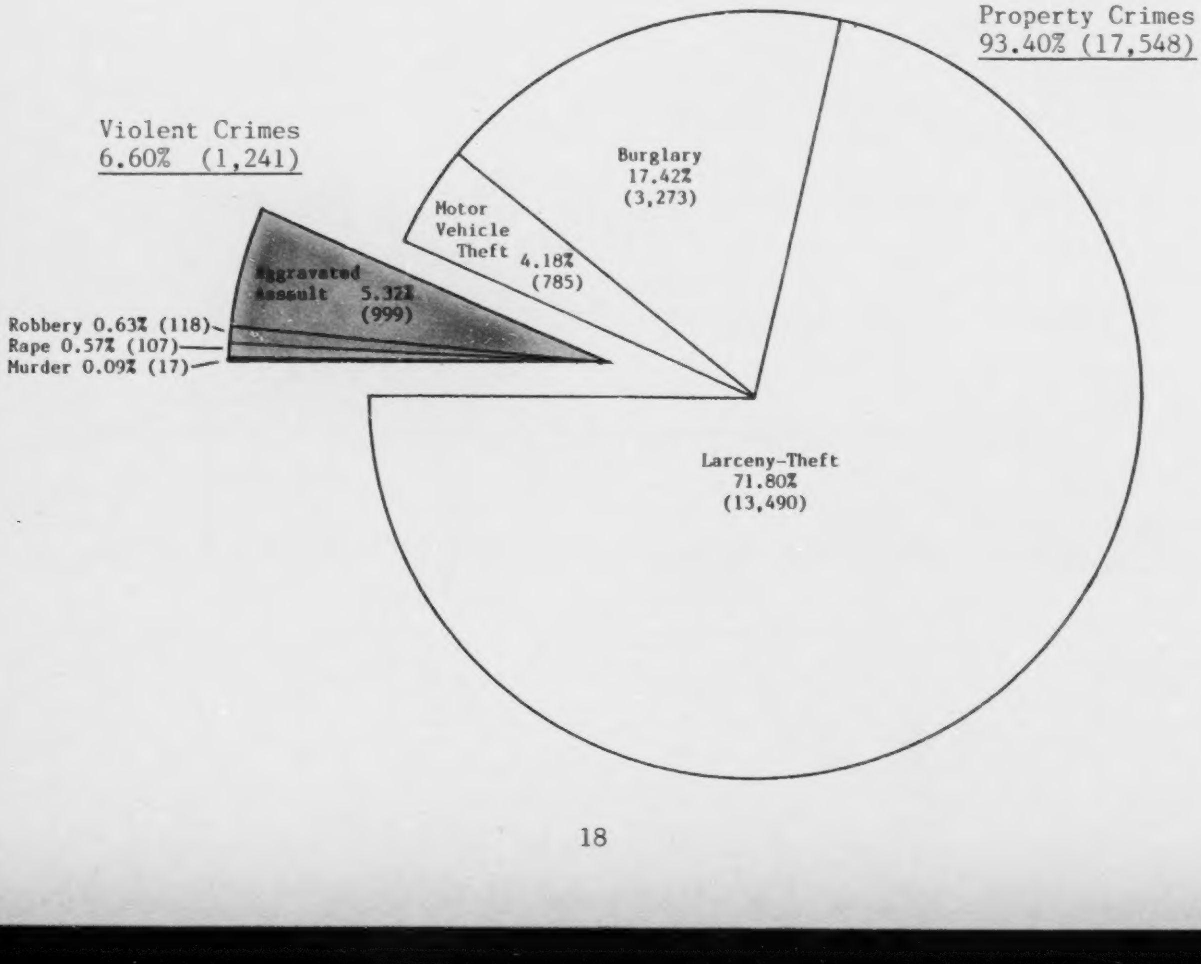
[7] The "covered population" represents the Wyoming population that is covered by law enforcement agencies who contribute UCR data, and is the population base used in calculating crime rates.

DISTRIBUTION OF INDEX OFFENSES

During 1984, a total of 18,789 Crime Index offenses were reported to Wyoming law enforcement agencies. By far, the bulk of all offenses reported in 1984 were property crimes. These totaled 17,548 or 93.4 percent of the total Index. Larceny-theft alone accounted for 71.8 percent of the total Index in 1984 and 76.9 percent of all property crimes. As a group, violent crimes were responsible for only 6.6 percent of the Crime Index total.

Given the larger volume of property crimes, any change noted in the Crime Index, as a whole, is primarily a result of the direction the property crimes take. For instance, even though the violent crimes noted an increase of 2.5 percent in 1984, the overall change amounted to an 8.4 percent decline

Figure 9
DISTRIBUTION OF INDEX OFFENSES
1984



for the Index in its entirety. This more subtle change is a result of a 9.1 percent drop in property crimes.

The distribution of the violent and property Index offenses during the past five years, as evidenced in Figure 10, has roughly varied with the total volume of crime. As the amount of crime increased in 1981, the proportion of violent Index crimes also increased, climbing from 8.0 percent in 1980, to 8.2 percent in 1981. As the volume of crime declined in 1982 and 1983, the proportion of violent Index crimes also subsided. However, in 1984 the total index declined 8.4 percent, but the proportion of crimes which were violent rose to 6.6 percent of all crime. Throughout 1984 there was a steady increase in the proportion of crime which was violent, regardless of the total crime changes (derived from Table 5).

	1980	1981	1982	1983	1984
Property	92.0%	91.8%	93.8%	94.1%	93.4%
Violent	8.0%	8.2%	6.2%	5.9%	6.6%

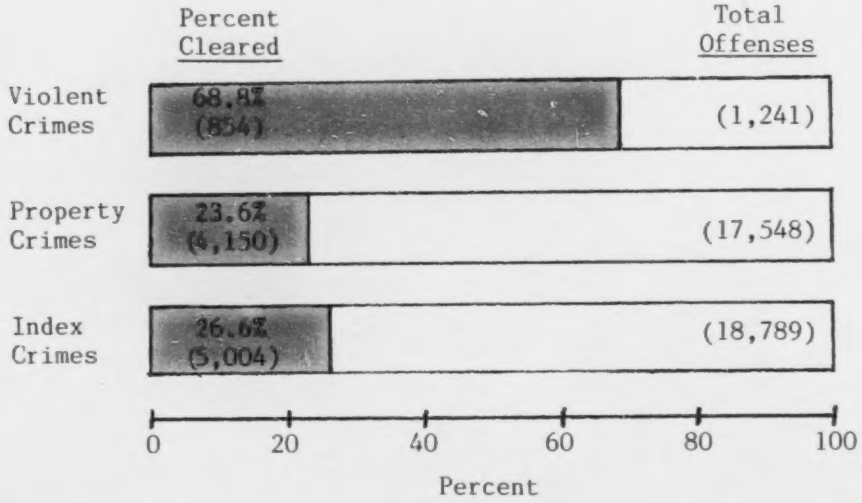
CLEARANCES

For Uniform Crime Reporting purposes, an Index offense is cleared when 1) a law enforcement agency has identified the offender, 2) there is sufficient evidence to charge the offender, and 3) the offender is actually taken into custody. The arrest of one person can clear several crimes or several persons may be arrested in the process of clearing one offense. Clearances are also recorded in exceptional circumstances when some element beyond the control of the law enforcement agency precludes formal charges being brought against the offender.

Of the 18,789 offenses reported to the police during 1984, 5,004 were cleared, for an overall clearance rate of 26.6 percent. Violent crimes evidenced a substantially higher clearance rate than property crimes, with 68.6 percent of the violent crimes resulting in a clearance, while only 23.6 percent of the property crimes were cleared.

Figure 11

CLEARANCE RATES FOR VIOLENT, PROPERTY, AND INDEX CRIMES, 1984



The relatively high clearance rate for violent crimes compared to property crimes is due to several factors, including the volume difference between the two groups. During 1984, there were over fourteen times as many property crimes reported to law enforcement agencies as violent crimes. Also, because of their serious nature, law enforcement investigation of violent crime is usually more intensive. The element of personal confrontation between the victim and the offender may also contribute to the higher clearance rate for violent crimes.

Clearances involving only persons under eighteen years of age accounted for 24.2 percent of the total clearances reported in 1984. See Table 4. During this reporting period, 1,213 clearances involving only persons under eighteen years of age were reported, of which 7.6 percent or 92 were for violent crimes and the remaining 92.4 percent or 1,121 were property crimes clearances. The primary juvenile involvement was within the larceny-theft classification, which accounted for 76.0 percent of all juvenile clearances.

MONTHLY AND SEASONAL FLUCTUATIONS

While the total volume of Index offenses varied from month to month during the past five years, the table below and Figures 13-15 on the following pages illustrate the same general trend from year to year. The summer months continue to be high volume crime months, typically peaking in July, with the exception of 1983, which peaked in August. Not surprisingly, the third quarter, July through September, recorded more offenses during each of the five years than did any other quarter.

MURDER AND NON-NEGLIGENT MANSLAUGHTER

Murder and non-negligent manslaughter is defined by the Uniform Crime Reporting Program as the willful (non-negligent) killing of one human being by another. One offense is counted for each person willfully killed by another. As a general rule, any death due to injuries received in a fight, argument, quarrel, assault, or the commission of a crime is counted. Attempted murders and assaults to murder are scored as aggravated assaults and not as murder. Suicides, accidental deaths, and justifiable homicides are also excluded.

During the period of January through December, 1984, 17 murders were reported or known to the police, compared to 30 murders in 1983. A comparison on an agency-by-agency basis indicates a 56.7 percent decrease in the number of murders known to the police during 1984 when compared to 1983. Murder has the lowest crime rate of any of the Index offenses and it experienced a decline of 33.3 percent in 1984. The 1984 crime rate for murder was 0.4 offenses per 10,000 population, compared to 0.6 per 10,000 in 1983. Of the 17 murders committed during 1984, 13 offenses have been reported as cleared for a clearance rate of 76.5 percent. This compares to 83.3 percent or 25 clearances during 1983. The value of property stolen incidental to the 17 murders occurring in 1984 totaled $1,091. This compares to $4,499 stolen in 1983. Offenses of murder accounted for 0.09 percent of the total Index offenses reported or known to the police in 1984, compared to 0.14 percent in 1983, a decrease of 35.7 percent.

Given the comparatively low volume and the unique nature of the crime of murder, it is not surprising that we have seen substantial fluctuation in this offense during the past five years. The greatest number during the period was in 1982 with 38 offenses. A new low was established in 1984 with 17 offenses. The 17 offenses committed during 1984 represent a decline of 41.4 percent from the 29 offense level of 1980.

In all cases of murder reported in the Uniform Crime Reporting program, a supplemental homicide report is submitted by the participating law enforcement agency. This report provides pertinent information consisting of a situation code, the age, sex, race and ethnic origin of victims and offenders, the weapon used, the relationship of the victim to the offender, and any known circumstances or motives which led to the commission of the crime. Presented in the following tables is a summary of offense, victim and offender information on the homicides reported during 1984.

FORCIBLE RAPE

Forcible rape is defined in the Uniform Crime Reporting Program as the carnal knowledge of a female forcibly and against her will. Included in this offense category are attempts or assaults to commit rape. Statutory rape (without force) and other sex offenses are not included in this category. One offense is counted for each female raped or upon whom an attempt to forcibly rape has been committed.

During 1984, 107 forcible rapes were reported or known to the police as compared to 109 in 1983. A comparison on an agency-by-agency basis shows a 1.8 percent decrease in volume in 1984 from 1983. Of the 107 forcible rapes reported in 1984, 75 have been cleared for a clearance rate of 70.1 percent, compared to 71 clearances or 65.1 percent in 1983. In 1984, property loss in the rape classification was reported at $47, compared to $179 in 1983. Offenses of forcible rape and attempts to commit forcible rape accounted for 0.57 percent of the total Index offenses reported during 1984, or 7.5 percent more than the 1983 figure of 0.53.

Unlike the offense of murder, the forcible rape trend for the five year period, 1980-1984, was more consistent with thtat of the Crime Index in its entirety. The gain in 1981 was offset by decreases in each subsequent year. In 1982 both the volume and the rate of forcible rape returned to the 1980 levels. Marked reductions were recorded in 1983, with modest reductions in 1984.

By Uniform Crime Reporting definitions, the victims of forcible rape are always female. With this in mind, a more accurate account of the true victimization rate for this offense requires excluding males from the population base figure. For 1984, it is estimated that 48.0 percent of the covered state population was female, a total of 338,932 persons. When males are thus excluded from the population base figure, the rate of forcible rape climbs from 2.2 per 10,000 to 4.7 per 10,000.

It is important to note that victimization studies in recent years indicate that offenses of rape are not equally distributed throughout the female population; very young and very old females are victimized less frequently than the young to middle-aged females. Given this fact, a separate crime rate was calculated for females of ages 14 through 64 years. The victimization rate for this subpopulation of females rises to 7.2 per 10,000 population, substantially higher than the 4.7 reported for all females.

Though the UCR program does not collect age data for victims of rape, it is believed that the exclusion of females below 14 and above 64 years of age will have no significant affect on the validity of these figures.

Table 13

	Total Number of Persons	Rapes Known to Police	Crime Rate Per 10,000	Ratio of Rapes to Females
Wyoming Population[9]	476,969	107	2.2	--
Female Population[10]	228,932	107	4.7	1:2,140
Females 14 thru 64	148,746	107	7.2	1:1,390

---

[9] The crime rate for the entire population, male and female, is being provided for comparison with national statistics only.

[10] The percentage of the state population that is female and that portion 14 through 64 years of age is based on data compiled by the Division of Research and Statistics, Department of Administration and Fiscal Control, State of Wyoming; Wyoming Population and Employment Forecast, 7th Edition, August, 1984.

ROBBERY

Robbery is defined as the taking or attempting to take anything of value from the care, custody or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear. In any instance of robbery, one offense is counted for each distinct operation. The number of persons robbed or those present at the robbery is not considered when scoring this crime. Additionally, the number of persons committing the robbery has no bearing on the number of offenses being counted.

During the period of January through December, 1984, 118 robberies came to the attention of law enforcement officials, compared to 152 robberies in 1983. An agency-by-agency comparison with the same months for the two years indicates a 22.4 percent decrease in the number of robberies reported in 1984 from the previous year. The crime rate for robbery also noted a decline in 1984, dropping 21.9 percent. The 1984 crime rate of 2.5 robberies per 10,000 population was down from the 3.2 per 10,000 figure in 1983. Of the 118 robberies reported in 1984, 53 offenses have been cleared for a clearance rate of 44.9 percent. This compares to 54 clearances, or 35.5 percent, in 1983. The value of property stolen incidental to offenses of robbery in 1984 totaled $107,098 compared to $85,404 stolen in 1983. Robbery offenses accounted for 0.63 percent of the total Crime Index in 1984, down 14.9 percent from 1983 when robberies accounted for 0.74 percent of the Index.

Both the volume and the rate of robbery have decreased since 1980. The decline has accelerated since 1981, with the 1984 figures about 45 percent lower than in 1980.

AGGRAVATED ASSAULT

Aggravated assault is defined as an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could, and would, result in serious personal injury were the crime successfully completed. One offense is scored for each person assaulted or upon whom an attempt to assault has been committed.

During the period of January through December, 1984, 999 aggravated assaults came to the attention of the police, compared to 920 offenses in 1983. An agency-by-agency comparison with the same months for the two years reflects an 8.6 percent increase in the number of reported aggravated assaults during 1984 when compared to 1983. A crime rate of 20.9 offenses per 10,000 persons was witnessed in 1984, compared to 19.4 per 10,000 in 1983, a rise of 7.7 percent. Of the 999 aggravated assaults known to law enforcement agencies in 1984, 713 have been cleared for a clearance rate of 71.4 percent. This compares to 621 clearances recorded in 1983 for a clearance rate of 67.5 percent. Offenses of aggravated assault accounted for 5.3 percent of the total Index offenses reported during 1984, compared to 4.5 percent in 1983, an increase of 17.8 percent.

Aggravated assaults noted moderate increases in both the volume and rate of crime from 1980 to 1981. These increases, however, were followed by substantial declines during 1982 and 1983. As a result of the magnitude of these declines, both the volume and rate of aggravated assaults recorded in 1982 through 1984 fell below the level established in 1980. See Figures 27 and 28.

SIMPLE ASSAULT

The simple assault category includes all assaults which did not involve the use of a firearm, knife or cutting instrument, or other dangerous weapon and which did not involve serious or aggravated bodily injury to the victim. Simple assault is not a Crime Index offense, however, it is collected under the assault category for quality control and for the purpose of reviewing total assaultive violence.

During the period of January through December, 1984, 1,482 simple assaults were reported or known to the police, compared to 1,539 offenses in 1983. An agency-by-agency comparison with the same months for the two years reflects a 3.9 percent decrease in the number of simple assaults reported in 1984. The crime rate for simple assault also noted a decline in 1984, down from 32.5 per 10,000 persons in 1983 to 31.1 offenses per 10,000 persons in 1984, a decrease of 4.3 percent. Of the 1,482 simple assaults known to the police in 1984, 1,102 have been cleared for a clearance rate of 74.4 percent. This compares to a clearance rate of 70.7 percent, or 1,088 clearances of simple assault in 1983. Simple assaults accounted for 59.7 percent of the total number of assault offenses in 1984, compared to 62.6 percent in 1983, a decrease of 4.6 percent.

The five year trend for simple assaults evidenced substantial gains, followed by decreases, in both the volume and rate of crime during this period. Sizeable increases were posted for 1981 and 1982. The number of simple assaults recorded in 1983 dropped markedly from 1982, followed by a small decrease in 1984. The volume and rate of simple assaults remain above the levels established in 1980 by 14.8 percent and 11.9 percent, respectively, as can be seen in Figures 31 and 32.

LAW ENFORCEMENT OFFICERS ASSAULTED

All assaults on law enforcement officers who have full arrest powers in which the officer sustained serious injury or in which a weapon was used which could have caused serious injury or death are included in this section. Also counted are those sworn officers who were not injured, provided the assault was more than mere verbal abuse or minor resistance to an arrest. An offense is counted when an officer is assaulted in the line of duty, even though in an "off duty" status, where he is performing official law enforcement duties.

On the average, seven of every 100 law enforcement officers, statewide, were assaulted in 1984, compared to a rate of nine of every 100 officers in 1983. During 1984, 94 assaults on law enforcement officers were reported, compared to 112 assaults in 1983, a decrease of 16.1 percent. Of the 94 assaults reported during 1984, 98.9 percent or 93 of these assaults have been cleared as compared to 110 clearances or 98.2 percent in 1983. Injuries were sustained in 27.7 percent of the assaults in 1984, compared to 17.9 percent of the assaults in 1983.

The volume and rate of assaults on law enforcement officers over the past five years has noted similar trends to many of the Index crimes. An increase was noted in 1981 which was followed by declines in subsequent years. Comparing 1984 assaults with the 1980 level, the volume and rate of assaults fell 20.9 and 31.0 percent, respectively.

---

[11] The crime rate for assaults on law enforcement officers is assaults per 100 officers.

In all cases of assaults on law enforcement officers reported in the UCR program, a supplemental report is submitted by the participating law enforcement agency. This report provides detailed information regarding assaults on law enforcement officers. The supplemental reports categorize the type of activity, type of weapon, type of assignment, assault clearance data, whether the assault resulted in injury by weapon category and the time the assault occurred. The following figures and tables present a summary of the 1984 data on assaults on law enforcement officers compiled from these reports.

BURGLARY

The Uniform Crime Reporting Program defines burglary as the unlawful entry of a structure to commit a felony or a theft. The use of force to gain entry is not required to classify an offense as burglary. Burglaries in the UCR Program are categorized into three subclassifications: forcible entry, unlawful entry where no force is used and attempted forcible entry. One offense is counted for each distinct operation.

During the period of January through December, 1984, 3,273 burglaries were reported or known to law enforcement agencies compared to 3,602 burglaries during 1983. An agency-by-agency comparison with the same months on file for the two years reflects a 9.1 percent decrease in the number of reported offenses in 1984 when compared to 1983. The 1984 crime rate for burglary was also down, from 76.1 burglaries per 10,000 population in 1983 to 68.6 offenses per 10,000 persons in 1984, a decrease of 9.9 percent.

Of the 3,273 burglaries during 1984, 756 clearances have been recorded for a clearance rate of 23.1 percent. This compares to a clearance rate of 19.3 percent or 696 clearances of burglary in 1983. The value of property stolen incidental to burglaries in 1984 totaled $2,432,595, down 4.1 percent from the 1983 total of $2,535,434. Of all known burglaries in 1984, 57.9 percent involved residences compared to 57.1 percent in 1983. Offenses of burglary accounted for 17.4 percent of the total Index offenses reported in 1984, compared to 17.6 percent in 1983, a decrease of 1.1 percent.

The five year trend for burglary, as can be seen in Figures 41 and 42, closely follows the trend established by the Crime Index as a whole. For both the volume and rate of burglary, moderate increases were noted in 1981, followed by moderate declines in 1982 through 1984. Both the volume and rate of burglaries in 1984 were approximately 25 percent lower than the 1980 levels.

LARCENY-THEFT

Larceny-theft is defined as the unlawful taking, carrying, leading or riding away of property from the possession or constructive possession of another. It includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle theft, etc., in which no use of force, violence or fraud occurs. This crime category does not include embezzlement, "con" games, forgery or worthless checks. Motor vehicle theft is also excluded from the larceny category for crime reporting purposes inasmuch as a separate category is designed to capture motor vehicle thefts.

During the period of January through December, 1984, a total of 13,490 larcenies were reported or known to the police compared to 14,807 larcenies during the previous year. An agency-by-agency comparison with the same months on file for the two years shows a 9.2 percent decrease in the number of reported larcenies from the 1983 figure. The larceny crime rate of 282.8 per 10,000 population for 1984 was down 9.7 percent from the 1983 crime rate of 313.2 larcenies per 10,000 population. Of the 13,490 larcenies reported during 1984, 3,064 have been cleared for a clearance rate of 22.7 percent. This compares to a clearance rate of 19.9 percent or 2,950 clearances of larceny in 1983. Of the total larcenies reported during 1984, 35.8 percent were under $50 in value, 34.1 percent were $50 to $200 in value, and 30.1 percent were over $200 in value. Larceny offenses accounted for 71.8 percent of the total Index offenses during 1984, down 0.7 percent from 1983 when larceny comprised 72.3 percent of the total Crime Index.

Since larceny-theft represents the bulk of all Index offenses, the five year trend experienced by the Crime Index as a whole is substantially influenced by the trend larceny takes, and when compared, very similar trends emerge. See Figures 47 and 48. During 1980-1981, a moderate increase in the volume and rate of larcenies was noted, which was followed by a slight decline in 1982. Accelerated declines continued in 1983 and 1984. By the end of 1984, both the number and rate of larcenies were well below the 1980 levels.

MOTOR VEHICLE THEFT

Motor vehicle theft is defined in the Uniform Crime Reporting program, as the theft or attempted theft of a motor vehicle. This definition excludes the taking of a motor vehicle for temporary use by those persons having lawful access thereto. Also excluded are thefts of farm equipment, construction equipment, airplanes and motor boats, the thefts of which are scored as larcenies. One offense is counted for each vehicle stolen or where an attempt is made to steal a motor vehicle.

During the period of January through December, 1984, a total of 785 motor vehicle thefts were reported or known to the police as compared to 848 motor vehicle thefts in 1983. An agency-by-agency comparison with the same months for the two years reflects a 7.4 percent decrease in the number of reported offenses during 1984 when compared to 1983. Of the 785 thefts of motor vehicles known to police in 1984, 330 offenses have been cleared for a clearance rate of 42.0 percent. This compares to 322 clearances or 38.0 percent in 1983. The value of property stolen incidental to motor vehicle thefts during 1984 totaled $3,212,087 compared to $4,211,456 stolen in 1983. Offenses of motor vehicle theft accounted for 4.2 percent of the total reported Index offenses in 1984 compared to 4.1 percent in 1983, an increase of 2.4 percent.

The motor vehicle theft crime rate of 16.5 offenses per 10,000 population in 1984 was down 7.8 percent when compared to the 1983 rate of 17.9 motor vehicle thefts per 10,000 population. In 1984, an average of 1 of every 637 registered motor vehicles was stolen statewide compared to 1 of every 590 in 1983. The 1984 motor vehicle theft rate per 10,000 registered motor vehicles was 15.7 compared to a rate of 16.9 per 10,000 in 1983, for a decrease of 7.1 percent.

Table 27

MOTOR VEHICLE THEFT CRIME RATE
1984

	NUMBER	OFFENSES	RATE PER 10,000	RATIO OF MV THEFTS
Covered Population	476,969	785	16.5	1 : 608
1984 Registered MV's	500,397	785	15.7	1 : 637

Unlike the five year trend experienced by the Crime Index as a whole, the volume and rate of motor vehicle thefts have been steadily decreasing over the past five years. As a result of the steady decline, as can be seen in Figure 51 & 52, the number of motor vehicle thefts reported in 1984 is half of the number reported in 1980, down 51.9 percent, while the rate dropped 53.5 percent from the level established in 1980.

ARSON

Arson was established as a Crime Index offense by congressional mandate in the latter part of 1978. It is defined as any willful or malicious burning or attempt to burn, with or without intent to defraud, of a dwelling house, public building, motor vehicle or aircraft, or personal property of another.

During the period January through December, 1984, a total of 102 arsons were reported or known to the police compared to 110 arsons in 1983. An agency-by-agency comparison with the same months for the two years shows that arson offenses were down 6.4 percent in 1984. The 1984 arson crime rate also showed a decrease, down from 2.3 arsons per 10,000 population in 1983 to 2.1 arsons per 10,000 in 1984. This represents an 8.7 percent decrease in the arson crime rate for 1984. Of the 102 arsons known to the police in 1984, 42 have been cleared for a clearance rate of 41.2 percent. This compares to 42 clearances or 38.2 percent for 1983. The estimated value of property damage during 1984 was less than a quarter of the damage reported in 1983. The estimated value of property damage incidental to arson in 1984 totaled $910,619 compared to $4,254,960 in 1983.

The five year trend for arson also varied from the trend experienced by the Crime Index as a whole, as is evident in Figures 57 and 58. Compared with 1980, there has been a steady three year decline for the volume of arson, with 1984 arsons matching the previous year. The rate, per 10,000 inhabitants of Wyoming, has continued to decline since 1980. As a result of ~~this~~ steady decline during the last four years, both the volume and rate of arson fell more than a third below the 1980 levels. See Figures 57 and 58.

INDEX OFFENSES BY COUNTY

Figures 62 - 64, on the following pages, illustrate the crime rates, per 10,000 population, for each county in Wyoming during 1984. Figure 62 displays the Crime Index rates by county. Figures 63 and 64 show the violent crime rates and property crime rates, respectively. Although the rates are computed for the whole county, the occurance of offenses is seldom distributed evenly throughout the county. Table 31, in the following section, presents rates for each reporting agency, as well as the county average.

Population figures used for calculating crime rates were derived from data made available by the U.S. Department of Commerce, Bureau of the Census, 1980 Census of Population and Housing, and the State of Wyoming, Department of Administration and Fiscal Control, Division of Research and Statistics, Wyoming Population and Employment Forecast, 7th Edition, 1984. Estimated population, by county, is reported in Table 31.

Since property offenses compose most of the Crime Index offenses, there is close correspondence between property offense rates and the total Crime Index rates. However, violent offense rates do not correspond as closely with the county distribution of the Crime Index rates. This is especially true of counties with higher violent crime rates.

INDEX OFFENSES BY CONTRIBUTOR

Table 31, on the following pages, illustrates Crime Index offenses, excluding arson, by county and agency for January through December, 1984. A column displaying 1983 Index totals is provided for agency comparison. Also presented is the percent change by county and agency where sufficient months were on file to reasonably calculate the percent change.

The population coverage figures are presented to provide the base used to calculate the crime rate per 10,000 population. Population figures in this report were calculated from data published by the U.S. Department of Commerce, Bureau of Census, 1980 Census of Population and Housing, and the State of Wyoming, Department of Administration and Fiscal Control, Division of Research and Statistics, Wyoming Population and Employment Forecast, 7th Edition, 1984.

The crime rate was not computed for agencies with less than twelve months on file. The same agencies were also excluded when calculating county and state crime rates.

For agencies desiring to calculate rates using their own population figures, the formula is as follows:

$$\text{Rate} = \frac{x}{y} \times 10{,}000$$

Where: x = the number of offenses

y = the population base

To alter the "rate" figure, simply substitute another number for 10,000 (e.g. 1,000, 500, 250). For example, if a community of 1,250 residents experienced 49 offenses during the year and would like to know the crime rate per 1,000 residents, the formula would be:

$$\text{Rate} = \frac{49}{1200} \times 1000$$

Dividing 49 by 1,200, then multiplying that number by 1,000 we get 39.2 offenses per 1,000 residents.

---

[13] The extremely high crime rate noted for Hot Springs State Park Police is primarily the result of the very low resident population base figure. It should be noted that the population of the Park is predominantly made up of residents of the Wyoming Pioneer Home.

STOLEN AND RECOVERED PROPERTY

Supplementary reports relating to the value of property stolen and recovered are also provided by the participating law enforcement agencies. This supplementary report requires a value to be established for property stolen and recovered for each Crime Index offense. The determination of the value of property stolen is an obligation of the investigating officer. The following suggested procedures aid in this determination.

A. Use fair market value for items subject to depreciation.

B. Use the wholesale cost of goods stolen from retail establishments, warehouses, etc.

C. The victim's evaluation of non-depreciable items.

D. Use replacement cost or actual cash cost to victim for new or almost new items.

Additional Guidelines:

A. When recovered property is in a condition different from what it was at the time of the theft, the value at the time of recovery is used even though it is less than at the time it was stolen.

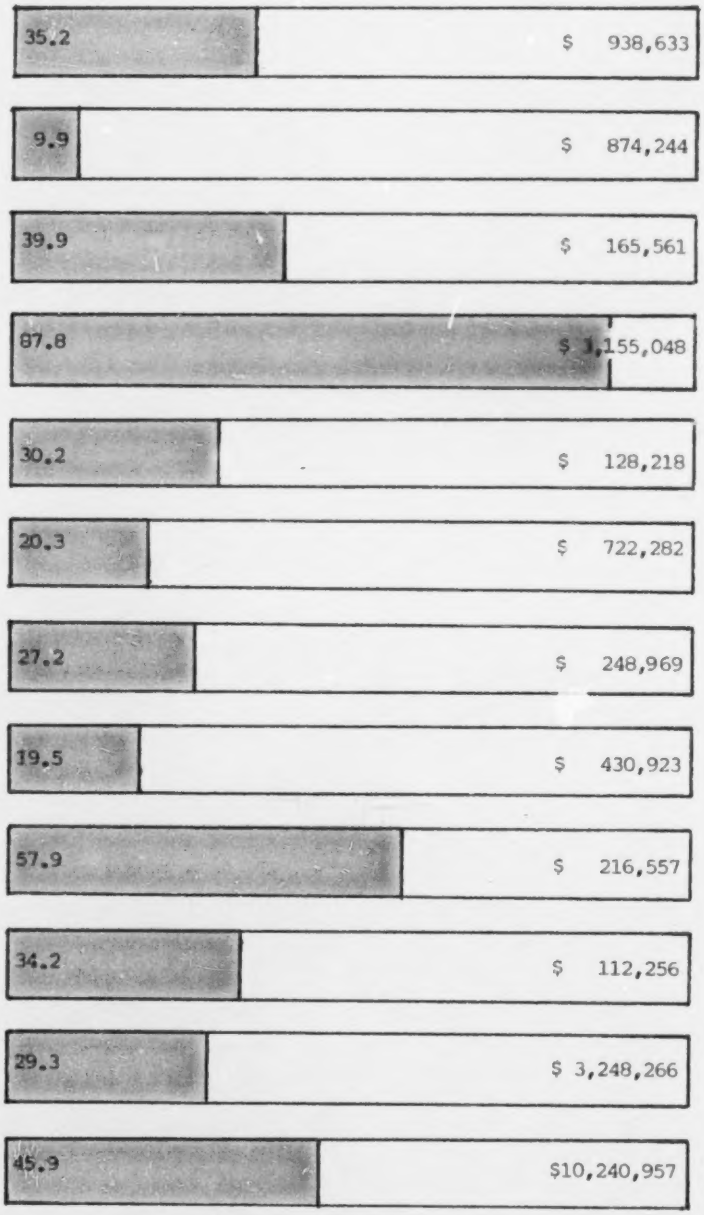
B. The value of property stolen only refers to property stolen incidental to crimes which occur in that jurisdiction and the value of property recovered includes only property originally stolen from that jurisdiction. However, it does not matter who recovers the property or where it was recovered.

The Figure and Tables on the following pages illustrate the data provided by these supplemental reports.

Figure 65

VALUE OF LOCALLY STOLEN AND RECOVERED PROPERTY BY TYPE

January - December, 1984



TYPE OF PROPERTY	VALUE RECOVERED	PERCENT RECOVERED	VALUE STOLEN
Currency, Notes, etc.	$ 330,365	35.2	$ 938,633
Jewelry and Precious Metals	$ 86,792	9.9	$ 874,244
Clothing and Furs	$ 66,021	39.9	$ 165,561
Locally Stolen Motor Vehicles	$ 2,768,766	87.8	$ 3,155,048
Office Equipment	$ 38,675	30.2	$ 128,218
Televisions, Radios, Stereos, etc.	$ 146,747	20.3	$ 722,282
Firearms	$ 67,689	27.2	$ 248,969
Household Goods	$ 83,937	19.5	$ 430,923

PERSONS ARRESTED

Although primarily an indication of law enforcement activity, the number of arrests provides a limited profile of the perpetrators of crime, especially for those crimes which have high clearance rates. Differences in arrest practices, policies, and enforcement emphasis among agencies influence the volume of arrests for various offenses, particularly those against public order, e.g., drunkenness, simple assault, vagrancy, disorderly conduct and related violations. However, arrests for serious crimes, e.g., robbery or burglary, are more likely to be consistent and uniform throughout all jurisdictions. Procedures employed in the UCR Program require that an arrest be counted on each separate occasion an individual is taken into custody, notified or cited for committing an offense in that jurisdiction. Also, although several charges may be placed against a person at the time of arrest, only one arrest is counted each separate time he is taken into custody.

During 1984, Wyoming law enforcement agencies made 25,213 arrests, compared to 26,031 in 1983. This represents a decrease of 3.1%. During 1984, arrests of persons under 18 years of age rose by 0.5 percent and arrests of persons 18 years of age and over were down 3.8 percent. When only arrests for the Modified Crime Index (includes arson) offenses were used for comparison, juvenile arrests were down 3.8 percent, while arrests of adults fell 4.7 percent. Total arrests for Modified Crime Index offenses were down 4.4 percent in 1984 when compared to 1983.

Statewide, 4.5 percent of all arrests involved persons under 15 years of age, 22.1 percent were under 19 years of age, 38.1 percent were under age 22, and 69.1 percent of those arrested were under age 25.

Further analysis of arrests of youthful offenders illustrates persons under 19 years of age comprised 40.9 percent of those arrested for Modified Crime Index offenses, 13.2 percent of those arrested for violent crimes, and 45.0 percent of those arrested for property crimes.

When reviewing only the Modified Crime Index offenses (includes arson), 16.2 percent of Wyoming arrests in 1984 were persons under 15 years of age, 40.9 percent were under age 19 and 57.1 percent were under 22 years of age.

For all offenses, arrests of males were down 3.3 percent and down 2.2 percent for females, in 1984 from 1983. Arrests of males outnumber those of females by nearly 5 to 1 with males accounting for 76.4 percent of the arrests for Modified Index crimes and 94.6 percent of the arrests for violent Index crimes. Female arrests for Modified Index crimes increased 7.0 percent from 1983. Female criminal involvement continues to be related mainly to larceny, which accounted for 92.0 percent of all female Modified Index offense arrests.

Illustrated on the Tables that follow is Wyoming arrest data for 1984. The first two Tables present State total summaries which are followed by Wyoming arrests by county and agency.

It should be noted here that juvenile arrests are in accordance with the age definition of a juvenile for the National Uniform Crime Reporting Program (a person under 18 years of age).

LAW ENFORCEMENT PERSONNEL

Because of varying demographic and other jurisdictional characteristics, the requirements for law enforcement service differ greatly from one locale to another. For example, the needs of a community having a highly seasonal population may be extremely different from one whose population is relatively stable. In view of differing service requirements and responsibilities, caution must be used when attempting any comparison of law enforcement employee rates. The rates presented in the following tables should be viewed as guides or indicators, not as recommended or desirable police strengths. Adequate manpower for a specific locale can only be determined after thorough study and analysis of the various conditions which contribute to the requirements for law enforcement service in that jurisdiction.

OFFENSES IN UNIFORM CRIME REPORTING

Offenses in Uniform Crime Reporting are divided into two groupings designated as Part I and Part II crimes. Information on the number of Part I offenses known to law enforcement, the number cleared by arrest or exceptional means, and the numnber of persons arrested is reported monthly. Only arrest data are reported for Part II offenses.

The Part I offenses are as follows:

1. Criminal Homicide - a. Murder and Non-Negligent Manslaughter: The willful (non-negligent) killing of one human being by another. Deaths caused by negligence, attempts to kill, assaults to kill, suicides, accidental deaths, and justifiable homicides are excluded. Justifiable homicides are limited to: (1) The killing of a felon by a law enforcement officer in the line of duty; and (2) The killing of a felon, by a private citizen, while in the act of committing a felony. b. Manslaughter by Negligence: The killing of another person through gross negligence. Excludes traffic fatalities. While manslaughter by negligence is a Part I crime, it is not included in the Crime Index.

2. Forcible Rape - The carnal knowledge of a female forcibly and against her will. Included are rapes by force and attempts or assaults to rape. Statutory rape offenses (no force used/victim under age of consent) are excluded.

3. Robbery - The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

4. Aggravated Assault - An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Simple assaults are excluded.

5. Burglary-Breaking or Entering - The unlawful entry of a structure to commit a felony or a theft. Attempted forcible entry is included.

6. Larceny-Theft (except motor vehicle theft) - The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Examples are thefts of bicycles or automobile accessories, shoplifting, pocket-picking, or the stealing of any property or article which is not taken by force and violence or by fraud. Attempted larcenies are included. Embezzlement, "con" games, forgery, worthless checks, etc., are excluded.

7. Motor Vehicle Theft - The theft or attempted theft of a motor vehicle. A motor vehicle is self-propelled and runs on the surface and not on rails. Specifically excluded from this category are motorboats, construction equipment, airplanes, and farming equipment.

8. Arson - Any willful or malicious burning or attempt to burn, with or without intent to defraud, of a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

The Part II Offenses are:

9. Other Assaults (simple) - Assaults or attempted assaults where no weapon was used and which did not result in serious or aggravated injury to the victim.

10. Forgery and Counterfeiting - Making, altering, uttering, or possessing, with intent to defraud, anything false which is made to appear true. Attempts are included.

11. Fraud - Fraudulent conversion and obtaining money or property by false pretenses. Included are larceny by bailee and bad checks except forgeries and counterfeiting.

12. Embezzlement - Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

13. Stolen Property; Buying, Receiving, Possessing - Buying, receiving, possessing stolen property, including attempts.

14. Vandalism - Willful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without consent of the owner or person having custody or control.

15. Weapons; Carrying, Possessing, Etc. - All violations of regulations or statutes controlling the carrying, using, possessing, furnishing, and and manufacturing of deadly weapons or silencers. Included are attempts.

16. Prostitution and Commercialized Vice - Sex offenses of a commercialized nature, such as prostitution, keeping a bawdy house, procuring or transporting women for immoral purposes. Attempts are included.

17. Sex Offenses (except forcible rape, prostitution, or commercialized vice) - Statutory rape and offenses against chastity, common decency, morals, and the like. Attempts are included.

18. Drug Abuse Violations - State and local offenses relating to narcotic drugs, such as unlawful possession, sale, use, growing and manufacturing of narcotic drugs.

19. Gambling - Promoting, permitting or engaging in illegal gambling.

20. Offenses Against the Family and Children - Non-support, neglect, desertion, or abuse of family and children.

21. Driving Under the Influence - Driving or operating any vehicle or common carrier while drunk or under the influence of liquor or narcotics.

22. Liquor Laws - State or local liquor law violations, except "drunkenness" (offense 23) and "driving under the influence" (offense 21). Federal violations are excluded.

23. Drunkenness - Drunkenness or intoxication. Excluded in "driving under the influence" (offense 21).

24. Disorderly Conduct - Breach of peace.

25. Vagrancy - Vagabondage, begging, loitering, etc.

26. All Other Offenses - All violations of state or local laws, except offenses 1-25 and traffic offenses.

27. Suspicion - No specific offense; suspect released without formal charges being placed.

28. Curfew and Loitering Laws - Offenses relating to violation of local curfew or loitering ordinances where such laws exist.

29. Runaways - Limited to juveniles taken into protective custody under provisions of local statutes.
